

Senior Geospatial Engineer

Next Tier Concepts, Inc. is actively looking for a Senior Geospatial Engineer to support several key projects with government and commercial clients. This position would be based in the Washington, DC area. The candidate will be responsible for integrating several key geospatial technologies (ESRI, Google Earth / Maps, and various Open Source) to develop an enterprise system for visualizing geospatial information.

Required Skills

- Demonstrated experience building and maintaining geospatial solutions consisting of ESRI or Google technologies
- Proficient with Google Earth (Earth Enterprise a plus)
- Clear understanding of geospatial concepts and terminology
- Familiar with Open Geospatial Consortium (OGC) formats
- Knowledge of common geospatial data formats (ie. Shapefile, KML, GeoTIFF, MrSID, etc)
- Experience geospatial data processing and transformation
- Ability to work with minimal guidance, prioritize work, and handle multiple tasks under tight deadlines
- Strong interpersonal skills and manage client relationships necessary (will be a primary customer interface)

Experience

- A minimum of 8+ years of experience with geospatial systems, including design, implementation and maintenance
- Bachelors Degree in a technical field (Geography or GeoSciences a plus)
- Excellent Communication skills (will be a primary customer interface)
- Experience with Google Earth Enterprise
- Experience with Linux / UNIX operating systems
- Experience with shell / Perl or other scripting languages in a Linux environment

Requirements

Citizenship	US Citizen
Security Clearance	Clearable (TS desirable but not required)
Job Location	Vienna, VA; Reston, VA
Duration	Full Time
Start Date	Immediately
Travel	Limited

How to Apply

Email your resume (including references and salary requirements) in MS Word or Adobe Acrobat format to jobs@ntconcepts.com.
